

- 1) The Perpendicular Bisector Theorem states that if a point is on the perpendicular bisector of a segment, then it is _____ from the endpoints of the segment.
- 2) The Angle Bisector Theorem states that if a point is on the bisector of an angle, then the point is equidistant from the _____ of the angle.

Use the figure at the right for exercises 3-6.

- 3) How is \overline{WY} related to \overline{ZX} ?
- 4) Find WZ
- 5) Find ZY
- 6) Find VX

Use the figure at the right for exercises 7-9.

- 7) Find the value of x
- 8) Find AB
- 9) Find AD

Use the figure at the right for exercises 10-12.

10) Find the value of x .

11) Find AD

12) Find CD
